WORK EXPERIENCE

UI/UX Designer | Deerhold Ltd.

Fellowship Program || Apr 2021 - Jan 2022 (10 months)

Workd as a fellow where my main responsibilities were to design Pillar pages for Deerhold's website. I got the opportunity to learn designing in figma , prototyping design elements, working as a team, communication skills during the time period I spent here.

Junior React Developer | Code Himalaya

Trainee(Mar) -> Full-time(May) || Mar 2022 – **current**.

The main responsibilities I have/had while working here are:

- Core frontend development in **Mobile Finance Technology Protal V2**. (Chakra-ui, react-query)
- Frontend Development for **Subisu Client Web-App** using ReactJS, react-query, Axios, Material UI and Typescript.
- Design and develop website for the sibling company **Mobile Finance Technology** using Native HTML, CSS and JS

PROJECTS

Lost Ravens EPK (<https://www.lostravens.com/>)

A resume for the record label "Lost Ravens" that provides the essential information to showcase the artist's releases, discography, press releases, etc. Including signing up for newsletters and releases.

Technologies used: **HTML, CSS, JavaScript.**

Generative Art using p5.js ([live link](#))

An interactive web-app made using HTML, CSS, JS (jQuery, p5.js, VanillaJS) where the user can create and learn about generative art.

This website features a sketch named **Weave.js** made from scratch using 3 different concepts (**Kaleidoscope, perlin noise and bezier curves**) which generates unique and random symmetrical generative art with a huge range of customization option.

Link: <https://en-ryuu.github.io/weave.html>

It is also available as a live wallpaper for Wallpaper Engine on [Steam](#).

Technologies used: **HTML, CSS, P5.js, JQuery.**

Portfolio ([github link](#))

My personal portfolio made using Next.js which contains only concepts of routing, components and javascript with clean UI.

This is a work in progress with plans for dynamic information adding and detailed projects view.

Technologies used: **Next.js, Html, SCSS, JavaScript.**

Discord Clone ([github link](#))

An attempt to clone the functionalities of discord using react, socket.io, node, mongodb and jwt authentication.

This is a work in progress.

Technologies used: **Next.js, Html, SCSS, JavaScript.**

Covid-X ([github link](#))

A pandemic resource management system, that displays covid data throughout Nepal. I contributed on this project by handling all frontend UI/UX design and development.
